Additional Initiatives and/or Services
Delivery Management Solutions

1. We use a high-performance delivery management solution software that delivers an incredible user experience to our employees, and customers.

2. It covers Last Mile, Same Day & Next Day, Distribution, Scheduled, Routed, and On-Demand deliveries, bringing everything together from dispatch automation to delivery scheduling, route optimization, accounting, driver settlement, and more.

3. Delivery Operations through EDI & API technology for automation and efficiency improvement.

With our software, we bring complete visibility to stop-sequencing and ETA's based on the best delivery approach, thanks to its built-in Route Optimization.

Our ETA's factor in real-time traffic and can be easily shared among operations.
